Hi,

Thank you for your interest in working for Siemens EDA in Saskatoon! I'm Amanda Jonnala, the Senior Talent Acquisition Partner, and I'm reaching out regarding the next steps for your application to the Software Developer position. **Note that the selected candidate for this position will be required to work full-time from our Saskatoon office**.

Please read carefully the following instructions and questions. We can unfortunately not accept different formats than those mentioned below.

For the next step in the process, please reply back with the following information:

1. Are you legally able to work in Canada? If yes, under which status (citizen, PR, work permit, etc.)?
2. Your last available transcript, if you graduated in the last 5 years (or are about to graduate)
3. A code sample that best represents you as a programmer, in the language you are most comfortable in, in .txt or ZIP format - ideally a single file, or please highlight what file we should look at. Please note your code must be submitted in .txt or ZIP format. Our servers will not allow .py files to come through (even if in a ZIP folder).
   - It should be something you are proud of and that you would find interesting or useful to talk about in a job interview
   - We are looking for a clean, well-written, well-documented code that should be more than 50 lines
   - It should be readable and self-explanatory through comments, naming of variables, etc.
   - It should be a reflection of the kind of code you'd deliver in production software
   - If possible, please keep to a single file or indicate which would be the most interesting to review
   - Jupyter notebooks can unfortunately not be accepted for code samples
4. If you've interviewed with us before and the date that the interview took place
5. Please let us know your coding preference (ex: 70% Python, 20% C++, 10% Java)
6. Put these skills in the order you feel you are best at: Linux, testing, source control (Git), debugging, profiling, GUI design (Qt), memory optimization, high-performance data structures and algorithms, multithreaded programming
7. Attach a copy of your most recent resume.
8. When you reply, please update the subject line to include your first and last name. Example: RE: Software Developer - Siemens Software Saskatoon – First Name Last Name

Feel free to let me know if you have any questions!

Thanks,

Amanda Jonnala *(She, Her, Hers)*
